

# GAZI FUAD MD. TAHSIN

Team Leader, Mobile App Development | Full Stack Developer | Backend Engineer

Narayanganj, Dhaka, Bangladesh | +8801537399940 | gazitahsin323@gmail.com | LinkedIn | GitHub

## PROFILE

Full Stack Developer & Team Leader with hands-on experience in backend engineering, system architecture, and technical leadership. Skilled in designing scalable system architectures, secure APIs, database structures, and end-to-end application solutions. Experienced in sprint planning, code reviews, mentoring developers, and leading projects from requirements and system design through development and delivery. Strong at combining technical expertise with client communication and team leadership to build reliable, scalable software and deliver projects efficiently.

## SKILLS

**Leadership & Management:** Team Leadership, Sprint & Task Planning, Code Review & Mentoring, Client/Stakeholder Communication, Project Management, Technical Architecture Decisions

**Backend Development:** Node.js, Express.js, Python, Java, PHP, C, C++, REST API Design, JWT Authentication, Firebase, MongoDB/Mongoose, MySQL

**Frontend Development:** JavaScript, TypeScript, React, Next.js, Tailwind CSS, HTML/CSS

**Mobile (Leadership & AI-Assisted Delivery):** Flutter, Dart, GetX, GoRouter — guided delivery hands-on with the help of AI development agents

**Integrations & Cloud:** Stripe, RevenueCat, Cloudinary, Cloudflare R2, Resend (Email), Socket.io

**Tools & Practices:** Git/GitHub, Postman, API Integration, Query Optimization, Competitive Programming (Codeforces, CodeChef)

## EXPERIENCE

### ScaleUp Ads Agency

May 2025 – Present

#### **Team Leader, Mobile App Development (Promoted from Backend Developer) — Apr 2026 – Present**

- Promoted to Team Leader after strong backend performance; lead a mobile app engineering team through sprint planning, code review, and mentoring.
- Own client and stakeholder communication end-to-end and make key architecture and technology decisions for backend and mobile systems.
- Manage full project lifecycles from planning through deployment, staying hands-on with mobile development with the help of AI development agents.

#### **Backend Developer — May 2025 – Apr 2026**

- Designed and built RESTful backend APIs using Node.js, Express, TypeScript/JavaScript, and MongoDB for production client projects, including marketplaces, job platforms, education systems, and logistics apps.
- Implemented secure authentication systems, including JWT, Google/Apple social login, Firebase account management, and protected session handling.
- Integrated payment and subscription systems (Stripe, RevenueCat), including purchase flows, refund handling, and in-app purchase support.
- Built real-time notification systems using Socket.io for SOS/admin alerts, plus transactional email and OTP delivery via Resend.

- Optimized database performance through indexing and query optimization; integrated Cloudflare R2 and Cloudinary for secure media handling and resolved critical environment-secret exposure issues.
- Delivered TypeScript/Next.js admin, seller, and business-owner dashboards with session and token-expiry management.

#### **TS4U IT — Backend Developer**

*Oct 2024 – Apr 2025*

- Led backend development for Orbit Task, successfully launching its beta version.
- Managed the entire backend for Vocalize Pro, integrating OpenAI for AI-driven features and handling social media API integrations.
- Implemented updates and improvements to the backend of an established e-commerce platform.

#### **GogoshopBD — Full Stack Developer (MERN)**

*Jun 2023 – Feb 2024*

- Developed and maintained features across the frontend and backend of an e-commerce platform.
- Optimized database queries and improved API performance.
- Ensured a seamless, consistent user experience across the platform.

### **PROJECTS**

---

#### **Multi-vendor Restaurant Management System with Integrated E-Restaurant (Capstone Project)**

- Built a multi-vendor restaurant platform combining POS, inventory and employee management, order management, and a customer-facing e-restaurant experience. Stack: React, Tailwind, React Query, Node.js, Express, MongoDB, JWT, Stripe.

#### **Krypton (Application)**

- Java-based encryption application providing strong AES encryption, secure data handling, and cross-platform, regulation-compliant data protection.

### **HONORS & AWARDS**

---

- Participated in the ICPC Asia Dhaka Regional Contest 2021 (team event); Runner-up, University Programming Competition.

### **EDUCATION**

---

#### **B.Sc. in Computer Science & Engineering — RP Shaha University**

*2024*

- CGPA: 3.66 / 4.00

### **REFERENCE**

---

**Dr. Kingkar Prosad Ghosh** — Associate Professor & Head, Dept. of CSE, RP Shaha University
